THE LAUNCH

The launch is a 100% fair launch. There will be no presale, it is being directly launched on PancakeSwap.

The initial investors and admin will all be purchasing TurkeyCoin from their own pocket at launch, as will all new investors.

THE TEAM

The TurkeyCoin team has a flat organisational structure, meaning everyone involved is equal and decisions are made by voting. Our team consists of a mix of marketers, developers, designers, and investors.

The team have provided:

- 0.8 BNB for the initial liquidity pool. 1.3 BNB was spent on the second liquidation.

SECURİTY

The BSC marketplace has been an incredible place for growth in the past year. With minimal transaction fees it has allowed DeFi to become more accessible to everyone, regardless of wealth and opportunity. While this has been, overall, fantastic news, the BSC network is notorious for manipulation. It is important to acknowledge potential security issues and address them. TurkeyCoin have taken the following steps to ensure it is as safe as possible:

1.	LOCKED PANCAKESWAP LIQUIDITY

The liquidity pool tokens for TurkeyCoin are permanently locked in the zero-address, meaning that the developers cannot pull the rug on the market, and the PancakeSwap market will always have liquidity on it. Here is the transaction of the LP burn:

2.	OUR SECURE İNFRASTRUCTURE İS READY

The TurkeyCoin contract is launched directly on PancakeSwap. At launch there is 600,000,000,000,000 TurkeyCoin in the distribution and 400,000,000,000,000 in the burned address. Burning will be done in daily and 2-day periods at our incineration address. so we didn't want to burn them all in the first stage.

Our team is knowledgeable about security and support. By using all our efforts for the progress of our project, we will provide a reliable environment for our investors, and we will reward their support as TurkeyCoin.

3.	5% FEE ON EACH SALE GOES TO THE LOCKED LIQUIDITY POOL

On each sale of TurkeyCoin 5% of the sale value is passed to the locked liquidity pool, increasing the security and stability of the currency.

Marketing

All future marketing will be community-driven, removing the need for a marketing tax on transactions. This does mean that we'll neednity toacomestrongtogetherto helpcomovemuthe project forward — something that we're confident we can accomplis

The TurkeyCoin team will be launching their own marketing strategy to help organically grow the community. Together, this community will help spread the word and bring people on board to join this exciting project.
